Retiree RxCare may add or remove drugs from our formulary during the year. If we remove drugs from our formulary **or** add prior authorization, quantity limits and/or step therapy restrictions to a drug **and/or** move a drug to a higher cost-sharing tier, we will notify you of the change at least 60 days before the date that the change becomes effective.

There are two exceptions to the 60-day advance member notification requirement:

1. If the Food and Drug Administration (FDA) deems a drug on our formulary to be unsafe **or** the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary.
2. When the FDA approves a first time generic for a brand name drug, we may immediately allow a brand to generic substitution. Notification to the member will be made but can occur after the substitution is made.

FORMULARY CHANGES EFFECTIVE 11/01/2020	
Medication Name	**Change Description**
dimethyl fumarate 120-240 mg capsule dr	- Added to Tier 5 - PA Added: TECFIDERA (s) - QL Added: 120 / 365 OVER TIME
